

Streann Media's Revolutionary SaaS OTT Platform Integrates Zixi

INNOVATIVE DISTRIBUTION, ENGAGEMENT AND MONETIZATION TOOLS FOR THE ULTIMATE END USER EXPERIENCE

HIGHLIGHTS

STREANN MEDIA INTEGRATES ZIXI

Streann Media's SaaS platform leverages the industry leading Zixi protocol to delivery content with ultra-low latency to the company's innovative OTT video delivery platform.

KEY FEATURES:

- Create live stream content or upload on-demand content
- Real Time video delivery with award winning interactive tools
- Receive live streams from anywhere leveraging the global Zixi Enabled Network
- 150+ proprietary features and patent pending technologies for content creators
- Deliver to Web, iOS, Android, Roku, Apple TV, Fire TV, Android TV and Smart TVs

STREANN MEDIA'S OTT PLATFORM POWERS NEXT GEN WORKFLOWS

Strean Media's Smart OTT platform and its advanced products such as Strean Studio allows users to create live stream content, upload on-demand content and build next generation Web 3 business models on Web, iOS, Android, Roku, Apple TV, Fire TV, Android TV, and Smart TVs. Stream Media's next generation solutions utilize more than 150 proprietary features and patent pending technologies facilitating effortless creation, distribution, engagement and monetization of content. Its global footprint allows content creators to reach millions of active users in 141 geographies while enabling users to take advantage of key product features such as:

· Inside-Chat

Enabling content creators to have real-time engagement with their users by simply watching and chatting resulting in increased retention rates.

· Inside-Ad

Embracing the power of non-intrusive advertisement with control over CPM pricing and keeping all the benefits of digital advertising using Streann Media's patented technology.

· Inside-Stories

Leverage the benefits of user-generated content with a monetary rewards system integrated with PayPal.

• Inside-Analytics

Provides real-time content metrics with machine learning analytics allowing users to understand audience behavior and run more efficient marketing ad campaigns.

Inside-Clip

This feature offers the option to create and schedule single, recycled and permanent video files.

Inside-Cast

Enables users to broadcast live streams to multiple destinations simultaneously including Facebook-Live, Twitter, Periscope, Youtube Live, Web, RTMP and other Internet applications.

· Inside-IQ

Content providers can create a more engaging and interactive experience for users by leveraging the advanced natural language processing technology of ChatGPT, leading to an exponential boost of engagement, better retention, and unique data insights.

Inside-Live

Allows users to effortlessly go live directly from the smart phone serving applications such as newsgathering and live content contribution.

Inside-Game

This feature allows users to gamify the content experience by creating trivia games for the platform and schedule time for the game and play.

Inside-Polls

Allows content creators to obtain real time user data knowledge through interactive polls.

ZIXI REAL TIME CONTRIBUTION FOR STREAMN MEDIA'S SMART OTT PLATFORM

Secure and broadcast quality live video transport with Zixi available on Strean Media's unique video delivery platform

Zixi, the global leader in video transport over public IP networks is leveraged by Stream Media to enable customers to contribute live video streams securely, reliably, and efficiently to its smart OTT platform. Stream Media offers world's most innovative and interactive OTT white label content creation, distribution, engagement, and monetization streaming platform.

Zixi's integration into Stream Media's smart OTT platform allows content creators to leverage Zixi's industry leading video over IP technology proven with over 15+ years of experience and trusted by over 1000+ media customers in 100+ countries to deliver and contribute video to and from global markets via the cloud and take advantage of unique features such as:

· Bonded Delivery

Combines disparate topologies including 5G, LTE, Leased Lines and Unmanaged Internet, dynamically adjusting for fluctuating bandwidth, network congestion, packet loss and latency differences

Network Efficiency

Reduces egress costs up to 30% - 50% when compared to other protocols

· Compute Efficiency

Reduces compute costs up to 50% by utilizing highly efficient ARM based processors

· Connection Validation

Industry leading security including DTLS connection security and content encryption

· Sequenced Hitless Failover

An improvement on SMPTE 2022-7, applies Zixi optimized alignment algorithms to re-create a single coherent uninterrupted stream out of multiple stream fragments

Reliability

Enhanced stream resilience with congestion aware routing and patented dynamic forward error correction (FEC)

· Quality Optimized Delivery

Quality optimized delivery with content aware bandwidth shaping
